Would you like to learn more about how to support your child's number work?
Join our free course!

Number Know How

The course will provide an opportunity for parents and carers to make resources and activities to support their child's skills. Topics may include puzzle making, creating jigsaws, counting, sorting, number formation, using operations and calculators and building 2D and 3D shapes.

Parents will work with a tutor for the first hour where they will get a chance to ask questions and develop their confidence in the school curriculum. Children will join each session at the end of the school day to help create fun resources.

Course	Day	Time	Venue	Date
Number Know How	Mon	14.30 - 16.30	Barlby Bridge Primary School	31 st October – 28 th November

I would like to attend the free Number Know How course.
Please reserve a place for me and my child.
